

 **实宜 SHEER**

SHEER MACHINERY (FOSHAN) CO., LTD

DESIGNED IN CHINA WITH GERMAN DNA.
MADE IN CHINA FOR THE WORLD.

SHEER MACHINERY

(FOSHAN) CO., LTD.

Sheer is a fast growing company in the Tissue industry, founded in 2015 in Foshan, Guangdong Province, the most developed area in China and a significant centre for manufacturing machinery.

Sheer bases its strengths on being a member of the Körber Group, an integrated international technology leader in different industries: the relationship with the foreign investors allows Sheer combining together the German technology and the China cost advantages.

OUR VISION

Sheer aims to become a valuable full-service partner for everyday business, on a long term run, by offering quality based technological equipment, with the best ratio quality-performance/price available on the Tissue market.

OUR CONCEPT

QUALITY TO VALUE.
RELIABILITY.

Sheer, in Chinese “Shi Yi”, is both the name of the Company and the name of the brand of the equipment produced: “Shi” means solid, reliable and “Yi” means suitable, good for value. Sheer delivers to the market reliable and good for value production lines.

The local R&D department and a mature supply chain, enable the Company to anticipate and satisfy emerging markets’ fast growing needs. Lines and equipment are fully engineered and manufactured in China to respond to tissue manufacturer’s requirements, for a wide range of products: toilet rolls, kitchen towels and facial tissue.

FACTS AT A GLANCE

Throughout **7,000** square meters' workshop, **80** employees and **30** technicians, Sheer produces and commercializes converting, inter-folder and packaging equipment. Sales and Service are in charge of business both in China and abroad, from Asia to Africa and South America.

OUR PRODUCTS

Sheer focuses on the production of tissue converting, inter-folder and packaging machineries.

- *Converting equipment include medium speed automated lines for toilet rolls and kitchen towels.*
- *Inter-folder equipment include medium speed automated lines for facial tissue.*
- *Packaging machineries range from wrappers, to pre-made bag fillers and bundlers.*

SW350

CONVERTING LINE

Sheer SW350 is a medium speed converting line, designed for emerging markets, to produce toilet rolls and kitchen towels.

The machine is equipped with SINCRO paper transferring system, proven to be the most efficient for tissue production after years of running.

A complete line configuration guarantees simplicity, versatility and efficiency, making it a valuable investment at an attractive price and high reliability.

Available in 2800 mm format, it can attain product diameters of up to 160 mm and cycle rates up to 20 logs/min.

The line is equipped with a versatile and accessible embosser, the Φ 320 mm steel rolls ensure high performance for any type of embossing from DESL to DECO.

Technical specifications

Format	2800 mm
Parent reel weight	Max diameter 2500 mm, Max weight 2500 kg
Speed	Up to 350 meters/min
Max. Log production	Up to 20 logs /min
Fixed perforation roll	With 4 serrated blade, axially adjustment
Rotating perforation roll	Two rotating perforation rolls, one with helix 4 mounted anvil blades, one with helix 6 mounted anvil blades, with elastic mounted
Transfer technology	Sincro
Embosser	DESL / DECO
Log Saw	2 Channels 240 cuts/min

Product Characteristics

Log diameter	From 90 mm to 160 mm
External core diameter	From 38 mm to 50 mm
Perforation length	Rotating roll with 4 blades, from 110 mm to 640 mm Rotating roll with 6 blades, from 85 mm to 690 mm
Sheet count	Adjustable from panel
